OK. I'll have to call Sam. He probably has no idea what the RIN is.

As an aside, can you please send me a copy of the HW generator presentation you developed for (I think) the permit writers workgroup? Long story. I'll stop by later. Thanks.

Jim,

This might be a topic/question for your RIN call participants?

*Thanks!*

Hey Ken,

I had a question regarding Emergency Permits that maybe you could help me with. Specifically, what states require them for the treatment of reactive and expired chemicals in order to make them safe(r) for transport? Usually, a laboratory (LQG or SQG) has a vendor that removes any hazardous chemicals that are no longer needed and transports them to a TSDF. Some of these chemicals are or maybe reactive and or ignitable. We would like to know how other states

authorize the situation when the vendor treats these chemicals as a safety precaution before they transport them to the TSDF. Maybe you know of other states we could ask that have inquired to you about this situation. If you have a chance, maybe you could give me a call to discuss. Thanks so much.

Hi Ken,  
Can you please add Sam Coe with California DTSC to your email distribution?  
Sam works on Emergency Permits and OBOD sites.  
Best regards,

Sam Coe
